10

CLAIMS:

- 1. A non-asbestos friction material made by molding and curing a composition comprising a fibrous base, a filler and a binder, the composition further comprising tin, tin sulfide, or a combination of tin and tin sulfide.
- 2. The non-asbestos friction material of claim 1, wherein the tin, tin sulfide, or combination of tin and tin sulfide is included in an amount of 0.1 to 15 vol%, based on the overall composition.
- 3. The non-asbestos friction material of claim 1, wherein the composition further comprises graphite.
